DETAILED ACTION

Interview Record Missing

Applicant's submission filed 4/9/2009 fails to include a proper interview record. Applicant must supply an interview record for the interview held 3/4/2008, a summary for which was mailed 3/11/2009. Any response to this Office Action will be held non-compliant unless accompanied or preceded by a proper interview record.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/9/2009 has been entered.

Election/Restrictions

Applicant's election with traverse of species II, figures 6-10, remains in effect. The election was made with traverse in the reply filed 10/10/2006.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 61-76 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims recite “the biasing member extending between the top surface of the frame and the lever” (last three lines of claim 61). Applicant has not pointed out where the amended claim is supported, nor does there appear to be a written description of the claim limitations in the application as filed such that this newly added limitation constitutes new matter. That is to say that the above limitations are not recited in the application as originally filed. Note that even the present application fails to provide antecedent basis for the terms in the written description. See marked-up version of applicants figure 8A below which clearly shows that applicant’s originally presented biasing member (69) does not contact the top surface (1000) of the frame (113) much less extend therefrom. Rather, the originally presented biasing member (68) extends between an inner surface (2000) of the frame and the lever.

Allowable Subject Matter

Claim 61 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 1st paragraph, set forth in this Office action and to include all of the limitations of claims 63, 64 and 76. Note that applicant should be careful to avoid unclear lack of antecedent basis and/or double inclusion problems when constructing such a claim.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new grounds of rejection.
